

Sizing Information

Please refer to the sizing guides below for assistance in sizing your uniforms and race suits.

NOTE: These measurements are only a guideline. All individuals are proportioned differently and many prefer to wear clothing differently, some tight, some loose. The Jacket & Pants chart tends to size garments on the large size for most Beyond-X except for the B200 series garments which are close fitting and run more true to the chart.

B200 SERIES JACKETS & PANTS: The B200 series garments are closer fitting than previous Beyond-X styles and run more true to the size chart. Kid's sizes tend to run on the small side.

RACE SUITS: Use the race suit sizing chart to determine size. Race suits run on the small side, if you are on the upper end of the weight range move to the next size up.

FLEECE AND SOFTSHELL GARMENTS: Use the fleece and softshell chart to determine sizing.
